

PROFESSIONAL EXPERIENCE

CACTILE GAMES Stockholm, Sweden

Sep 2025 – Present

Game Programmer

- Contributing to Goblin Getaway as it grows from an early prototype into an announced Steam project, initially alongside my Futuregames studies and now full-time with Cactile Games.
- Developing multiplayer gameplay features, game systems, and Unity tools for an online Friendslop game, with a focus on cooperative player interactions and iterative gameplay polish.

GREEN TILE DIGITAL Skövde, Sweden

Feb 2023 – Aug 2025

Gameplay Programmer

- Worked on Locomoto, a cozy life-sim train adventure game released on Steam (April 2025) and Nintendo Switch (June 2025), from early development through release and post-launch updates.
- Implemented core gameplay features and systems in Unity/C#, including train controls, NPC passenger interactions, crafting mechanics, resource loops, and a wide range of customizable interactables.
- Collaborated closely with designers, artists, and other developers to implement gameplay features and supporting tools, resolve day-to-day production issues, and polish features through iteration.
- Built reusable Unity/C# systems and development tools, integrating and adapting third-party plugins where useful to support rapid iteration, maintainable code, and game stability.
- Supported the Chinese player community through platform setup, issue resolution, creator outreach, and localization improvements.

BLACKDROP INTERACTIVE Karlskrona, Sweden

Apr 2021 – Jun 2021

Game Programmer Intern

- Implemented post-launch gameplay features for *Receiver 2*, a firearm-centric FPS released on Steam (June 2020), using Unity and C# to turn player feedback into new and improved mechanics.
- Resolved 20+ bugs across multiple gameplay systems.
- Paired with another programmer to prototype new weapon variants and map layouts in Unity.
